Portfolio: camiska.lat/en/

PROFESSIONAL SUMMARY

Software developer with one year of experience in enterprise applications, REST APIs, automation and relational databases. I work with Python/Django, Java/Spring Boot and SQL on integrations, data quality, metrics and reporting. I complement my professional experience with personal projects deployed on Linux and Docker.

PROFESSIONAL EXPERIENCE

ICOMM SOLUTIONS S.A.S. | Full Stack Developer

October 2025 - Present | Bogotá, Colombia · Remote

- Develop APIs and services with Python/Django and Java/Spring Boot, including business rules, role-based permissions and integration with React interfaces.
- Implemented Excel imports with pre-validation, duplicate checks, batch confirmation and row-level results.
- Contributed to scheduled workflows with operation history, notifications, retries and duplicate-operation prevention.
- Worked on PostgreSQL models and migrations and historical data-cleanup tools with dry runs and record preservation.
- Corrected calculations, aggregations and null handling to maintain consistency across metrics, charts and PDF/Excel exports.
- Added regression tests and access controls, and adjusted continuous integration with GitHub Actions and PostgreSQL.

RELEVANT PROJECTS

Nube Camiska | Personal project

Private file cloud built with Node.js and TypeScript, deployed with Docker on a Raspberry Pi. Features role-based access, streaming uploads, expiring links, SHA-256 verification and automated tests.

Demo available | Source code

DianiMilo | Collaborative planning app for couples

Collaborative PWA for shared plans, goals and lists, built with React, TypeScript, Node.js and Firebase. Integrates real-time Firestore updates, the TMDB API, per-device sessions and a demo with fictional data.

Demo available | Source code

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework, Java, Spring Boot, Node.js and REST APIs.

Data and analytics: SQL, PostgreSQL, Oracle, MySQL, modeling and migrations; pandas, NumPy, Streamlit and Power BI.

Systems and quality: Linux, Docker, Raspberry Pi, Git, GitHub Actions, Postman and integration/regression testing. Web development: TypeScript, JavaScript and React.

EDUCATION AND LANGUAGES

Software Engineering | Universidad Manuela Beltrán | 2021 - Present

Degree in progress. Native Spanish · English B2.

Additional training: Python Essentials 1 and NDG Linux Essentials, Cisco (2023); Cyber Threat Management, Cisco (2025); Continuing Education Program in Game Development with Unity and Unreal Engine, Pontificia Universidad Javeriana Cali (100 hours, 2026).
